Healthy Volunteers needed for a Research Study on Alcohol!

➤ ***What's that about?***

The Department I of Pharmacology, University of Cologne, is conducting a clinical trial investigating the metabolism of alcohol.

➤ ***What do I have to do with it?***

We are looking for healthy, adult volunteers (any sex). People with East Asian ancestry are of special interest because they metabolize alcohol differently.

➤ ***What will happen to me during the study?***

The most important: You will receive a dose of alcohol (vodka) on at least one occasion to reach an alcohol blood concentration of about 0.5-1.0 ‰ (less if you are sensitive to alcohol). We will then withdraw numerous blood samples during one day.

➤ ***What do I get for my participation?***

You will receive an appropriate allowance. If desired, we will inform you about your individual degradation rate of alcohol in the study.

➤ ***Where can I get more information and how can I participate?***
